built for purpose

Our technical standards and our products have the status of class 1 medical devices as defined by EU Directive 93/42 and we are CE registered with the MHRA (Medicines and Healthcare Regulatory Authority.)

All our products comply with the Furniture and Furnishings (Fire) (Safety) Regulations for general domestic use and contract use to crib 5.

frame

Engineered and built to meet high contract performance standards in healthcare situations and high domestic use. Constructed to BS EN 16139: 2013 using FSC® timber. Birch ply and birch hardwood used for shape and stress rails glued and stapled. Screws and bolts used for load-bearing. Frame parts are CNC milled for accuracy of cut parts, consistency of assembly and a robust stable frame.

seat and back suspension

The seat suspension is constructed from steel zig zag springs. The back suspension is elasticated webbing. Both seat, back and arms are padded with CMHR foam.

back cushion

Standard specification is CMHR foam core with 100% polyester Dacron wrap for loft and comfort

seat cushion

Standard seat duvet pad specification is CMHR foam core encased in fabric cover. The duvet wraps over the top of the seat box CMHR foam designed for support and comfort.

mechanisms

German engineered mechanism (TUV type approved) made from high quality steel with a powder coated finish for durability
